

## Picasa Help

When you enter Picasa you will get the screen shot below detailing the photo albums which have been loaded onto Picasa. Click on the appropriate image for the photo album you want to view

This will take you to the screen shot below showing the thumbnail images of the various photo making up the album. Click on the “slideshow” tab to start viewing the photo album

Continued on next page

When the slideshow first starts you will see the task bar. At this stage you can press the “-“ or the “+” to respectively decrease or increase the time interval between the showing of the photos. This task bar will disappear after a little while. Just move the mouse to bring it back into view. To quit the slide show click on the exit tab of the task bar or, alternatively, press the escape key marked Esc on your keyboard. This will take you back again to the second screen shot. If you want to view other photo album click on “Fr. Dan’s Public Gallery” this will take you back to the first screen shot detailing all the albums. Repeat the process to view another album. To return to the St. Bernardine’s site just close the Picasa window in the usual way.

In one particular instance, when Picasa is activated from the “Our Church” page of the web site, you are taken directly into a slideshow. The instructions detailed immediately above apply, however, when quitting the slide show it is preferable to close the Picasa window rather than exit from the task bar. The first option takes you directly back to the St. Bernardine’s web site.

Best of luck

Jim Margetson
